<p><b>Publish Date:</b> 1Q 11</p>	<p>"Proliferation of mobile services based on 3G wireless technologies and in the future, 4G technologies, places pressure on the mobile operators to alleviate some of the bandwidth demand by offloading traffic onto fixed networks" said Harry Wang, Director of Mobile Research with Parks Associates. "Service providers are taking this opportunity to bring about a convergence in fixed and mobile services through innovative services with the aim of reducing churn and increasing ARPU."</p>
